3	1	<p><b>Scrubber K-415 QuadScrubECO 230 V ± 10%, 50/60Hz, BUCHI</b> <b>PN 114152341</b></p> <p>The K-415 QuadScrubECO is a four-step gas scrubbing instrument with a powerful pump and condensation, neutralization, adsorption and reaction steps. Aggressive acid or alkali fumes are sucked off by means of the integrated pump into the first stage (condenser) for precondensation to avoid dilution of the second stage (neutralization). The output from the condensation stage is neutralized in the neutralization vessel. A third stage (adsorption) then collects particles from organic or inorganic substances. The fourth stage (reaction) is for specific reactions such as reduction or oxidation (e.g. for aqua regia digestion). Adjustable suction power for greater flexibility.</p> <p>ECO model: cooling water control to use just as much tap water as necessary (optional). The K-415 can be controlled via a digester.</p>	\$11.956,00	\$11.956,00
