1	1	DMA 6002 SOUND VELOCITY DENSITY AND SOUND VELOCITY METER, ANTON PAAR PN 325384 For the determination of density and sound velocity of liquids, as well as derived parameters - both measured in a single measuring cycle. The instrument features state-of-the-art technologies available exclusively from Anton Paar: ThermoBalance for rapid temperature changes without the need for complex re-adjustment, and the patented Pulsed Excitation Method based on the oscillating U-tube technology (U-Pulse). FillingCheck and U-View ensure reliable measurements. U-Dry, status light, and syringe illumination provide maximum ease of use. Automatic and fast viscosity correction across the entire measuring range guarantees precise results. A modular system enables easy expansion, "e.g. for integration with automated sample filling systems."''''	\$36.999,00	\$36.999,00
